Full Height Turnstile MT433

The single full height swing turnstile MT433, mini floor capped closed gate body, compact fence complete coverage protection, basic anti climbing and anti tailgating security functions are complete. Minimalist and compact design, with a delicate white painted body that is clean and durable. Suitable for small station sub stations, small and medium-sized industrial parks, community sports venues, and side doors of niche scenic spots. The installation is compact and tidy, does not occupy too much space, and is suitable for various simple venue decoration.

Economical full height swing gate are sold directly from the source factory, with no middleman markup for entry-level high security equipment, and affordable prices for small batch purchases; The process of simplifying and thickening materials is solid, and it is not easily damaged during daily use. The long-term maintenance cost for small and medium-sized venues is extremely low.

The width of the gate, the paint surface of the body, and the basic card swiping facial recognition device can all be customized according to needs, compatible with mainstream access control systems in the market, and a one-stop small entrance and exit security support. It can operate stably both indoors and outdoors, with a compact body that organizes the order of personnel entering and exiting. There is a need for access control in small and medium-sized venues, with low cost, complete basic security, small installation area, and fast construction.
