www.mairsturnstile.com

“Speed gate turnstile is a type of access control turnstile with a simple and atmospheric design, extremely fast traffic speed, and high traffic efficiency. It is suitable for places with high pedestrian flow. Speed gate turnstile is available in customizable widths and can adhere to ADA compliance standards.

The speed gate can pass 45-55 pedestrians per minute, one person per card, and the gate opening speed is very fast, about 0.4 times per second. It effectively solves the congestion of traditional doors and long-time queuing and greatly improves the traffic level. It is generally used in shopping malls and various office buildings to save time...”
